Deccan Health Care Limited Reports Strong Growth in Wellness Segment and Announces Expansion into Hydration and Sports Nutrition

Business Update

Deccan Health Care Limited (“the Company”) continues to witness strong momentum in its **Weight Wellness and Lifestyle product portfolio**, launched in December 2025. The category has delivered a positive performance and is contributing significantly to overall sales growth. Building on this success, the Company is focused on consolidating its presence in existing markets while expanding into adjacent and under served geographies during the current financial year.

As part of its strategic retail initiative, **the Company has launched its exclusive Wellness Marts (WM)** to strengthen consumer engagement and enhance brand visibility. **During Q4 of FY 2025–26, 20 Wellness Marts were successfully established.** The Company plans to further scale this network by adding 30 additional Wellness Marts in Q1 of the current financial year.

New Product Development

The Company is also pleased to announce the development of its new **Hydration Category Pipeline as part of its product portfolio.**

The new range focuses on hydration solutions designed to support everyday activity, recovery, and performance. The Company also plans to expand into the sports nutrition segment, catering to active lifestyle and performance-focused consumers, and is exploring potential partnerships in this space.

The products are being developed with a focus on effective hydration, ease of use, and better consumption experience, especially during physical activity, heat, and high-demand conditions. This expansion is aligned with the Company’s vision to build practical, science-led wellness products that support everyday health, activity, and performance.

Further updates will be shared as the products move closer to launch.
